Ladybird Academy - Apopka Apopka, Florida

RB Marks Construction Inc. was contracted to complete this 14,000 ground up school after the original contractor closed its business. We transferred the permit over to our license and **successfully worked through the transition with the building department.** Taking over after another contractor is never an easy situation for the owner, new contractor or all subcontractors. Through **constant communication and transparency,** our team created a smooth and productive transition period that resulted in a successful project for all parties involved. We have completed 2 other projects for this same owner and are contracted for a new ground up school in Texas and a renovation in Windermere.
